

## **Nathan Mantua, Ph.D.**

Nathan Mantua is an affiliate Assistant Professor of Atmospheric Sciences and Marine Affairs at the University of Washington, a full time research scientist with the UW's Climate Impacts Group, and the Assistant Director of the UW's Center for Science in the Earth System. Most of his current research is focused on regional impacts of climate on the water cycle, forests and marine ecosystems in the Pacific Northwest, and how climate information is or isn't being used in resource management decisions. He received a B.S. from the University of California at Davis in 1988, and a Ph.D. from the UW's Department of Atmospheric Science in 1994. He spent one year as a postdoctoral Fellow at Scripps Institute of Oceanography working on a pilot project for the International Research Institute for Climate Prediction. In April 2000 he received a Presidential Early Career Award for Scientists and Engineers for his climate impacts research and public outreach activities.
